

Flexibility for your pneumococcus vaccine project

✓ Raw materials for in-house assays

- Reference strains
- CWPS (multi) and polysaccharide antigens
- Omni, pool, group, type, factor antisera (Quellung & latex agglutination)

✓ Antigen identification & quantification assays

- Nephelometry with high titer antisera (all serotypes)
- Multiplexing solution
 - common vaccine serotypes kit
 - customization to change serotypes

✓ Clinical & surveillance applications

- ImmuView® *S. pneumoniae* Antigen Test (CE IVD)
- ImmuView® *S. pneumoniae* and *L. pneumophila* Urinary Antigen Test (CE IVD, 510(k) cleared)
- Serotyping portfolio (CE IVD)
- Multiplexing serosurveillance kits (RUO)

...and vaccine lifecycle expert support throughout your project.
